On Wednesday August 1<sup>st</sup> Stephanie will join us to provide an opportunity for people living with diabetes to get together in an informal, fun and supportive environment to share experiences and information. Family members are welcome to attend.

### **How safe is your camp / cottage from Wildfires this season?**

A few modifications within 10 metres of your home will have the biggest impact to reducing the threat of wildfire. Fire embers may seem small but are not to be underestimated— 50 % of the homes that burn from wildfires are started by sparks and embers.

Regular maintenance and cleaning in the corners and crevices of your home and yard where needles and debris build up will leave nothing for embers to ignite.

Sheath in the base of the decks, balconies and houses with fire resistant material to reduce the risk of sparks and embers igniting your home. A minimum of 15 centimetres of ground-to-siding non-combustible clearance is recommended.

Create / maintain a 1.5 metre non-combustible zone around your home and any attachments, such as decks.

Remove dead trees on your property, especially around buildings. Chip & scatter, the smaller the pieces the better; in contact with soil to absorb ground moisture, decompose.

Further information and recommendations can be found at: [WWW.FIRESMARTCANADA.CA](http://WWW.FIRESMARTCANADA.CA), including the Firesmart *Homeowners Assessment guide*

**SEE REVERSE FOR TEMAGAMI SENIOR HOME SUPPORT CALENDAR  
AND MONTHLY FIRE DEPARTMENT SAFETY MESSAGE.**
