FIRE SAFETY REMINDERS FROM THE TEMAGAMI FIRE DEPARTMENT

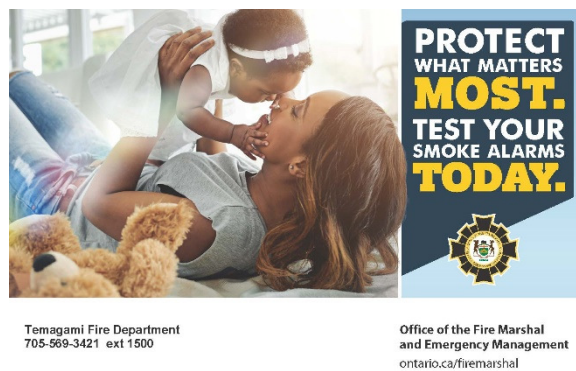

How safe is your camp / cottage from Wildfires this season?

Fire brands/embers may seem small but are not to be underestimated— 50 % of the homes that burn from wildfires are started by sparks and embers.

A few FireSmart actions within 10 metres of buildings will have the biggest impact to reducing the threat of wildfire. Maintain a 1.5 metre non-combustible zone around buildings and any attachments, such as decks.

Regular maintenance and cleaning in the corners and crevices of your home and yard where needles and debris build up will leave nothing for embers to ignite. Remember to remove any windblown leaves under the deck as well as any flammable debris from balconies and patios.

For more information, visit WWW.FIRESMARTCANADA.CA, download the *Firesmart Homeowners Assessment* found under *Manuals* in the *Resources Library*.
